

# Pillar 3 – Capital Adequacy and Risk Disclosures

Quarterly Update as at 31 December 2018

## Introduction

Rabobank Australia Limited (“the Bank”) is an Authorised Deposit-taking Institution (“ADI”) subject to regulation by the Australian Prudential Regulation Authority (“APRA”) under the authority of the Banking Act 1959.

In accordance with the Australian Prudential Standard 330 (“APS 330”), financial institutions are required to disclose prudential information. A subset of this information is disclosed quarterly.

## Verification of the Disclosure

This Basel III Pillar 3 Disclosure (“the Disclosure”) document is unaudited. However, the Disclosure (being prepared as at 31 December 2018) uses information consistent with the independently reviewed information that is supplied to APRA, and disclosure controls and procedures have been designed and implemented to effectively manage prudential reporting risk.

Additionally, it has been verified in accordance with Board approved policy, ensuring consistency with the Bank’s Annual Report.

## Background of Basel II and Implementation of Basel III

The Basel II Capital Accord principles took effect in Australia from 1 January 2008. The framework comprises of three pillars:

- Pillar 1: Minimum Capital Requirements
- Pillar 2: Supervisory Review Process
- Pillar 3: Market Discipline

In December 2010, the Basel Committee on Banking Supervision (“BCBS”) published a discussion paper on banking reforms. These major reforms are to be phased in from 1 January 2013 to 1 January 2019.

In September 2012, APRA published final standards for the implementation of the Basel III capital reforms in Australia. APRA has adopted a more conservative approach than the minimum standards published by the BCBS and a more accelerated timetable for implementation.

The Bank commenced reporting its regulatory disclosures to APRA under the requirements of Pillar 1 from 1 January 2008 using the Standardised Approach. The Bank also adopted the Basel III measurement of regulatory capital effective from 1 January 2013.

The Bank implemented the Pillar 2 requirements including documentation of its Internal Capital Adequacy Assessment Process (“ICAAP”) with the latest version approved by the local Board in March 2018.

## Scope of Application

The Bank is a Level 1 entity for regulatory (APRA) reporting purposes. The Bank is a solo entity, therefore it does not have any subsidiaries (Level 2 entities).

---

<b>Level 1</b>	Level 1 – Standalone basis (“Solo”)
<b>Level 2</b>	Level 2 – The consolidation of the Bank and all its subsidiary entities other than non-consolidated subsidiaries (“Consolidated”)

---

## Context

The Rabobank Group (“Group”) gained accreditation from the De Nederlandsche Bank (“DNB”), Group’s Home Regulator, to use the Advanced Internal Ratings Based Approach (“AIRB”) for credit risk and the Advanced Measurement Approach (“AMA”) for operational risk from 1 January 2008.

The Rabobank Group gained DNB accreditation to use the AIRB for credit risk from 31 December 2008 for the Bank’s Rural portfolio. The Rural lending portfolio is a significant majority of the Bank’s lending by exposure.

The Bank currently remains on the Standardised Approach for Credit, Market and Operational risk for APRA regulatory reporting.

## Nature of Business

The Bank continues to focus on the provision of flexible, competitively priced, secured loans to the rural sector in Australia. The Bank continues to provide internet banking services to retail clients through its RaboDirect division.

There were no significant changes in the state of affairs of the Bank during the financial year.

The following table provides a reconciliation of all regulatory capital elements to the Balance Sheet of the Bank in its audited financial statements.

REGULATORY CAPITAL RECONCILIATION				
	Balance sheet per published audited financial statements	Adjustments	Balance sheet under regulatory scope	Reference to Attachment A Table 1

## Attachment F

During the June 2019 quarter, the Bank was informed by APRA that the treatment of the Liquidity Coverage Ratio (LCR) for certain intra-group funding arrangements was under review. On 23 July 2019 the Bank was notified that it was required to restate the LCR for the previous 2 years, treating all intercompany loans regardless of their contractual maturity as “at-call”. As a result, the quarterly average LCR was restated from 128% to 30% for the quarter ended 31 December 2018. The quarterly average LCR was restated from 127% to 33% for the quarter ended September 2018. APRA acknowledged that Rabobank was financially sound, with strong liquidity and funding positions in the current stable environment. However APRA noted that to ensure the Bank would be able to withstand a scenario of financial stress, as for all Australian banks, its group funding agreements must be watertight, so they can be relied on when they would be most needed. The Bank is seeking to address and remediate this matter, including entering into a new intercompany funding agreement as soon as possible and is fully co-operating with APRA. The Bank must complete the restatement of its LCR and related public disclosures by 31 August 2019.

The Bank manages its LCR position on a daily basis that includes a buffer above the minimum regulatory requirement and according to the Board’s risk appetite.

The Bank maintains a diverse mix of liquid assets consisting of cash with the Reserve Bank of Australia (RBA), Australian Semi-Government and Commonwealth Government securities. This composition has remained relatively stable over the last year. The Bank also has access to \$300m of liquidity via the Committed Liquidity Facility provided by the RBA, and approved by APRA.

The LCR net cash outflow (NCO) represents potential cash outflows from on and off balance sheet activities within a 30 day liquidity stress scenario, after applying APRA prescribed run-off factors to maturing debt and deposits, and inflow factors to assets. As part of its overall liquidity management strategy the Bank manages its balance sheet in a manner that aims to manage NCOs within the Board’s risk appetite. The Bank’s funding is predominantly deposits, through retail branch clients or the RaboDirect online brand. There are very limited foreign currency transactions, or derivatives transactions in the Bank.

19	Secured lending (e.g reverse repos)	-	-	-	-
20	Inflows from fully performing exposures	611	427	574	400
21	Other cash inflows	11	11	1	1
22	Total cash inflows***	622	438	575	401
23	Total liquid assets		1,674		1,696
24	Total net cash outflows		5,537		5,178
25	Liquidity Coverage ratio (%)		30		33
	Number of data points used (Business Days)		64		64

\* Unweighted values are calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows)

\*\* Weighted values is calculated after the application of respective haircuts (for HQLA) or inflow and outflow rates (for inflows and outflows)

\*\*\* Adjusted values is calculated after the application of both (i) haircuts and inflow and outflow rates and (ii) any applicable caps (i.e cap on HQLA2 and cap on inflows)

The Bank manages its Net Stable Funding Ratio (NSFR) position on a daily basis that includes a buffer above the minimum regulatory requirement and according to the Board's risk appetite.

The NSFR represents the ratio of Available Stable Funding (ASF) against Required Stable Funding (RSF) from on and off balance sheet activities, after applying APRA prescribed ASF factors to maturing debt and deposits, and RSF factors to assets. As part of its overall liquidity management strategy the Bank manages its balance sheet in a manner that aims to manage NSFR within the Board's risk appetite. The Bank's assets mainly consist of lending to Rural clients with average maturity over 1 year, funded predominantly by retail branch clients and RaboDirect deposits. Funding shortfall is covered by intragroup funding from the Australian Branch of Rabobank. There are very limited foreign currency transactions, or derivatives transactions in the Bank.

**Table 21: NSFR disclosure template**

		December 2018					September 2018				
		Unweighted value by residual maturity				Weighted value	Unweighted value by residual maturity				Weighted value
Available Stable Funding (ASF) Item		No maturity	< 6 mths	6 mths to < 1yr	≥ 1yr		No maturity	< 6 mths	6 mths to < 1yr	≥ 1yr	
1	Capital	-	-	-	2,406	2,406	-	-	-	2,377	2,377
