Attachment F

The Bank manages its LCR position on a daily basis that is managed according to the Board's risk appetite and includes a buffer above the minimum regulatory requirement.

The Bank maintains a diverse mix of liquid assets consisting of cash with the Reserve Bank of Australia (RBA), Australian Semi-Government and Commonwealth Government securities. This composition has remained relatively stable over the last quarter. In addition, the Bank has in place a \$525m Committed Liquidity Facility with CRUA (the Parent) to boost the Bank's access to liquidity, if needed. The Bank also has access to \$375m of liquidity via the Committed Liquidity Facility provided by the RBA, and approved by APRA. The LCR net cash outflow (NCO) represents potential cash outflows from on and off balance sheet activities within a 30 day liquidity stress scenario, after applying APRA prescribed run-off factors to maturing debt and deposits, and inflow factors to assets. As part of its overall liquidity management strategy the Bank manages its balance sheet in a manner that aims to manage NCOs within the Board's risk appetite. The Bank's funding is predominately deposits, through retail branch clients or the Rabobank Online Savings channel.

There are very limited foreign currency transactions in the Bank, and interest rate derivatives are now being used to hedge interest rate risk residing in the Bank.
